Deflate is a fast, lightweight compression algorithm that is the de-facto standard for Internet messages. It is based on a combination of the LZ77 algorithm and a Huffman code.The combination of these two techniques enables it to be as fast as Huffman compression, while still achieving better compression. This can be achieved at the cost of some compression ratio. When the best compression is what is needed, Deflate is the algorithm to use. In the.NET Framework, Deflate is provided in two forms: the DeflateStream class and the DeflateStream class. APK Recycler is a powerful app for cleaning up APK,.ipa, Iab and apks.
