Our goal is to make it simple for you to download apps you'll love! We offer News, App Reviews, Discount Finder, and more. Lithium protects against oxidative stress-induced apoptosis in human neuroblastoma cell line SH-SY5Y. Lithium has been shown to be neuroprotective in both in vitro and in vivo systems. The present study evaluated the role of lithium on an oxidative stress-induced apoptotic pathway in human SH-SY5Y neuroblastoma cells. Cultures were exposed to 0.1 or 1 mM lithium for 24 h in the presence or absence of H₂O₂ (400 microm). The effect of lithium on viability of cells was determined by MTT assay. Apoptosis was measured by flow cytometry. DNA fragmentation was determined by ELISA. H₂O₂ treatment caused a significant reduction in cell viability, increased apoptosis and increased levels of DNA fragmentation. Lithium protected cells from apoptotic cell death and from DNA fragmentation when cells were treated with both H₂O₂

Thanks for watching :) Find More Free Software, Trials, Betas, Open Source, and Free Tools Sticky Notes is a simple and uncomplicated way to keep temporary information at a click away. It is available for both Android

What's New in the?

Swift and uncomplicated installation Along the way, web browsers evolved in more sophisticated and user-orientated programs, coming packed with a lot of useful features for a more productive personal and professional life. They provide customized themes to add a unique touch, different add-ons to protect our privacy, store sensitive information and optimize the browsing sessions. Platinum is a simple and minimalistic web browser designed to offer a quick way to navigate your preferred sites without having to deal with unnecessary add-ons that might complicate your life. The setup is over in a blink of an eye and uneventful. Browse your personal sites and easily download images It's wrapped in outdated yet user-friendly layout with only five buttons mostly for navigating between pages and a few settings, where you can change the home URL and the background image from three predefined ones. Unfortunately, you can't use your own pictures, and there is no option to download more from the developer's site. Pages and videos are loaded at a great speed while at the bottom of the window, a loading bar is displayed. Despite the fact that there is a choice to save images on the computer, the tool doesn't execute that command. What's more, the app doesn't come with privacy, bookmark and history features to easily secure the sessions from unwanted ads and harmful utilities. The bottom line On ending note, Platinum is a straightforward application created only for those who prefer a more basic and uncomplicated utility without additional components to simply chat with friends, watch clips and read your emails. Unfortunately, the app's offered functions leave much to be desired. Free Memory Monitor Free Memory Monitor is a graphical utility designed to monitor and free RAM and disk space in the system. It is completely free, so you can view and install it instantly from the Internet. It works with Windows XP/Vista and 7/8/8.1. Install without any registration You don't need to register to download Free Memory Monitor. It's easy to install and use. You can change the log files location and name. Command line features Using the command line, you can view and free memory used by your programs, system, files or external hard drives. You can also launch Free Memory Monitor from a batch file. It's very easy to use. Monitoring CPU Free Memory Monitor also includes CPU information. You can view the CPU usage of all running programs at once. You can use it to speed up your PC. Startup manager You can manage programs on startup and stop them from starting at the system start. Compare Compare different results for each process. Advanced

You can set different memory and disk settings. You can automatically close programs

System Requirements:

OS: OS X 10.10 or later (64-bit Intel processor, Power PC or 64-bit ARM processor) Processor: Intel Core 2 Duo or equivalent Memory: 2 GB RAM Hard Drive: 30 GB Graphics: Intel HD3000 or ATI or NVidia 7200, or at least DirectX 9.0c compatible video card Additional Notes: You can use the iMovie version of this app for OS X 10.9 or earlier, but you won't be able to do fancy editing with it.
